04/14/2022 [REDACTED] had requested to speak with me during the shift but I had not yet made it down to South to speak with him. He began telling other Officers how he was going to "act out" and "go crazy" to get something done regarding his issue. He was upset he did not get to see the doctor today. I advised him that the doctor's decisions were completely out of my control and that I could not help his issue. I advised him that I could speak with Officer Hill regarding his concerns but the doctors visits are out of my control. I then also advised him that threatening to cause a scene is not how he is going to get an answer to his question and that we would not tolerate his behavior if he continued to do so. He stated that he understood and then apologized for acting the way he did and stated that we would not have any further issues out of him EOR 668
